

LUMINOUS ANGEL

OVERVIEW

Luminous Angel is a decentralized platform focused on building security tools that offers safety to everyone in the crypto space.

We believe everyone should be able to carry out transactions safely and fairly without the fear of being hijacked by bad characters in the space.

Luminous Angel couldn't have arrived in the crypto space at a better time. It is essential to show the industry's true value and strength with a strong utility. We aim to portray a true legacy and build a modern template that other legit projects can adapt.

VISION & MISSION

- **Our vision** is to create decentralized platforms that enhance secure transactions in the crypto space.
- **Our mission** is to promote safety, fairness and transparency.

UTILITY

- SERVICE BOT

We're building a decentralized telegram bot that can facilitate trustless transactions between service providers and employees in the web3 space.

Developers or project leads who need verified and skilled hands on their team can hire without fear of being scammed using our automatic service bot.

Service providers looking to get employed or freelance with projects are assured of getting paid for their services without fear of being exploited by bad characters in the space.

UTILITY

- **GIVEAWAY BOT**

We are also building a decentralized bot that can process giveaways in a fair and transparent manner.

This will eliminate channels that run fake giveaways and also try to manipulate the process, because they will have to deposit the prize into the bot, which will serve as escrow, then the bot selects the winners randomly, based on the agreed criteria, without human intervention.

UTILITY

- **WHITELIST BOT**

The whitelist bot will function similarly to the giveaway bot in distributing projects' whitelist with transparency and fairness.

This will eliminate scenarios where influencers and other investors try to manipulate the process by getting multiple whitelist spots with their alt accounts.

RECOGNITION

Luminous Angel would reward deserving individuals and organizations in the space who are making tremendous impact and providing scalable solutions across the crypto industry.

The **Luminous Angel annual awards** would award folks based on quality of service and value offered on our marketplace, not vanity metrics like followers or audience.

An example would be for the launchpad category, we will reward launchpads based on the number of quality projects that have successfully scaled using their platform, not just based on the number of projects that launched or the number of followers they have.

We plan to put the spotlight on the true unsung heroes of the crypto industry.

TOKENOMICS

TOKEN DISTRIBUTION

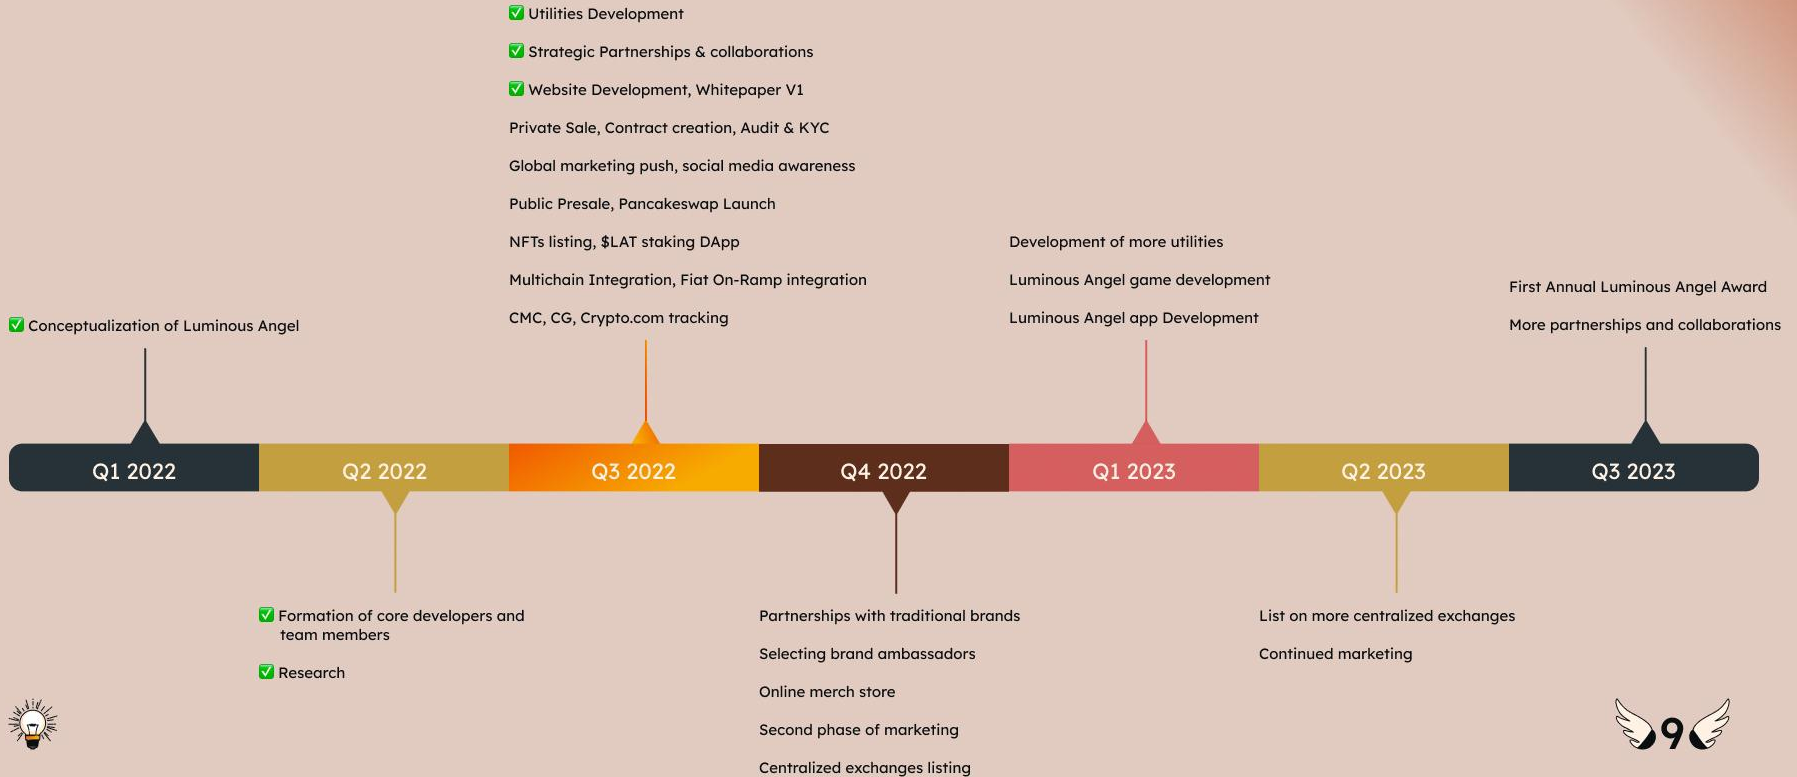

| | |
|--------------|-------------------|
| Total supply | 10 Billion \$LAT |
| Presale | 3.1 Billion (31%) |
| DEX | 1.7 Billion (17%) |
| CEX | 1.7 Billion (17%) |
| Private sale | 1 Billion (10%) |
| Staking | 1 Billion (10%) |
| Development | 1 Billion (10%) |
| Team | 500 Million (5%) |

TOKEN INFORMATION

| | |
|--------|----------------------|
| Name | Luminous Angel Token |
| Ticker | \$LAT |
| Chain | Binance Smart Chain |
| Type | BEP-20 |
